**LOG TABLE KIT - DIY FOR LOGOSOL SAWMILL**

**Log table kit - DIY for Logosol sawmill**  
Build a solid log table with smart fittings from Logosol. Make the boards yourself with your own sawmill. A good log table makes work with chain sawmills easy and ergonomic. The logs are at the right height and the log rollers make it easy to move the logs lengthwise.

**€323**

SKU 9999-000-1480

Get ready for sawing!

**Log roller with holder**

From the log roller, logs are easily rolled onto the log bed. The log roller with holder is mounted on the crossbar in front of the log bed in front of the saw to shift the log sideways. Use multiple log rollers to set up an assembly line to suit your needs.

## Extra robust for larger logs

- ✓ F2+ is an F2 on steroids! Heavier, stronger and engineered for up to 70 cm large logs.
- ✓ Saw long, saw heavy, it's all good! Essential parts are oversized for more space and weight, and you can easily extend the sawmill.
- ✓ With our over 30 years of experience in the industry, the sawmill has been refined down to the smallest detail.
- ✓ Removable guide rail makes the sawmill easy to store and to transport.

**EXTRA EXTENSION INCLUDED WHEN PURCHASING BAND SAWMILL!**

## B1001 Hydraulic Band sawmill

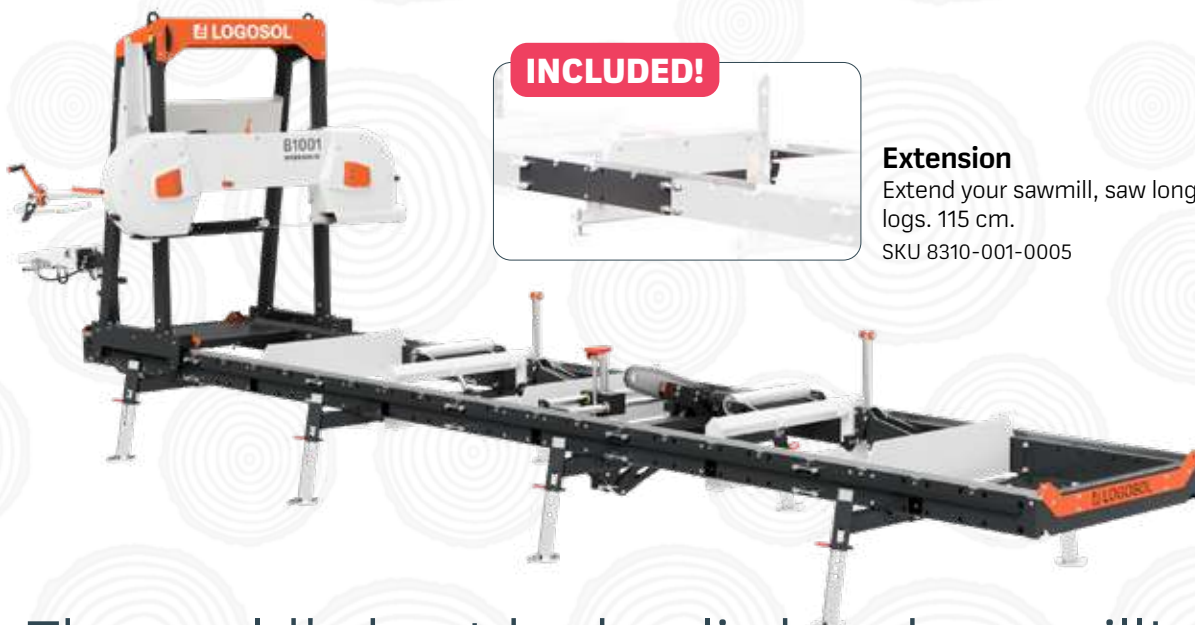

Swedish Quality Design

The sawmill in the photo is fitted with additional equipment.

Logosol's fully hydraulic sawmill, the B1001 Hydraulic, is a fantastic sawmill that gives you control of the sawing process from the control unit. Sawing is not only efficient, it also prevents wear and tear on your the body. You can effortlessly lift logs off the ground and rotate them into the correct position. Being able to easily handle logs up to 2000 kg is a fantastic experience. A wise choice for those who want a first-rate band sawmill that is a pleasure to use!

- ✓ You can entirely load, position, lock and rotate logs using the hydraulics.
- ✓ Control sawing from the control unit and avoid all that heavy lifting.
- ✓ The system's control unit is designed for optimal ergonomics and good visibility when sawing by being adjustable, both vertically and horizontally.
- ✓ You can buy a complete sawmill with hydraulics or buy the hydraulics later.

**INCLUDED!**

### Extension

Extend your sawmill, saw longer logs. 115 cm.

**EXTENSION INCLUDED IN PURCHASE!**

Value **€546**

### B1001 HYDRAULIC

12 kW electric motor

**€23 500**

SKU 8300-000-0034

The world's best hydraulic band sawmill!  
Quality in every detail.

- ✓ The hydraulics are engineered for heavy logs up to 2000 kg, i.e. the same size logs the band sawmill can handle.
- ✓ User-friendly design with integrated functions. A stable and stylish sawmill!
- ✓ Swedish-made band sawmill of Swedish steel with quality in every detail. Materials and component selections that you normally only find on industrial machines.
- ✓ With industrial quality components and durable materials, maintenance is minimal and the sawmill will be a joy and benefit for generations.

### Included as standard with B1001 Hydraulic:

2 log supports, 1 log clamp, 2 toe boards, 1 log rotator, 1 extension, 4 pairs of support legs, 1 band saw blade, adjustable feet, adjustable blade guide & water cooling!

✓ Log loaders can be added, see page 10!

• Peter Bräck at the container that houses his money-making machine, the CH3 multi-head planer.

## “My planer has paid for itself twice over!”

The Bräck family has numerous projects on the go at the same time, but when everyone helps out, it's both faster and more fun!

Just outside Gnesta in a large red building located on top of a hill, we meet Peter and Anna-Lena Bräck.

Peter stands by his planer and lifts away some completed mouldings. “I’ve done a lot of planing with my planer, including a lot of tongued and grooved boards, some rustic moulding and ordinary planed boards.” When he needs to keep the production level high, Peter gets help from the family. Both when there is planing to be done and when the kiln needs filling.

“I planed 150 running metres of rustic moulding last Sunday, and probably saved 17-18,000 kronor in the process,” says Peter proudly.

Many buildings have been constructed using their own timber, one of them being Brygghuset. The interior is covered with wide aspen boards that Peter has planed using trees from their own land.

“It’s both exciting and wonderful to be able to take advantage of nature’s resources in this way,” says Peter, standing in front of his CH3.

“All these projects and buildings would probably never have been completed if I hadn’t had my sawmill and my CH3 planer. That’s absolutely clear. My planer has paid for itself twice over,” says Peter.

• The planed aspen panels create a bright impression in the ceramics workshop in Brygghuset. The building also houses a honey extraction room and a brewing room.

• The Bräck family uses their planer for both renovations and new construction on their farm in Gnesta.

## New customer favourite: Remote feeding for chainsaw

**Logosol’s new remote feeding for chainsaws turned out to be what many customers had been waiting for! The accessory fits all chainsaws that can be used on Logosol’s chain sawmill.**

Many customers see huge advantages from standing at the end of the sawmill. From there, with the help of the new remote

feeding, you can efficiently and comfortably crank the chainsaw through the log.

“This is an accessory that

• The remote feeding is easy to mount on your chainsaw and makes sawing easier.

everyone wants and it performs even better than you’d think,” says Robert Berglund, Product Manager. “You avoid having to stand in sawdust spray and exhaust gases, and it makes sawing more comfortable.”

## CALCULATE WHAT YOU CAN SAVE FROM SAWING YOUR OWN TIMBER!

Sawing your own timber is profitable, and if you saw timber for a construction project, you’ll almost always earn back your investment.

You can saw about two cubic metres of mixed timber per day with our F2 and F2+ chain sawmills, and even more with a band sawmill. Expect a saw yield of at least 50%. That means that you will need about four cubic metres of timber per day. It’s difficult to calculate the cost of raw materials because so much depends on how you procure your timber and where you live. In Sweden, you can expect to pay €50 per cubic metre. That gives you a raw material cost of €200.

What it costs to saw two cubic metres of timber largely depends on the volumes of timber you saw. As for the service life of a sawmill from Logosol, you can expect it to be around for a very long time. Logosol started its business more than 30 years ago. We’re still in touch with customers who bought their sawmill several decades ago – sawmills that are still operating at full capacity.

In this example, we calculate €50 per cubic metre of sawn timber for depreciation, cutting equipment, oil, petrol or electricity.

Two cubic metres of sawn timber currently costs between €1200 and €1600 per cubic metre in the building materials trade in Sweden (October 2022).

With these figures, you can make the following calculation.

**Raw material cost:** €200 for 4 cubic metres of timber gives 2 cubic metres of sawn timber.

**Other operating costs:** €50 x 2 = €100 for 2 cubic metres of sawn timber.

**This means that you earn** at least €1200-€300 = €900 for one day’s work and 2 cubic metres of high-quality construction timber.

Virtually whatever values you insert for operating costs, timber costs and the investment in a sawmill, the results are extremely profitable. This calculation shows that your daily earnings will be impressive. It also appears to yield a profit even if you purchase timber for sawing.

• *Footnote: This calculation example is based on prices in Sweden in October 2022.*

**LWM 2022**  
Logosol World Meeting

• Ferry Svan impresses with his awesome technique as guests from all over the world gather at Logosol in Härnösand.

## WORLD-CLASS WOOD WORKERS VISIT!

At Logosol's regular World Meeting, staff, retailers and ambassadors meet at Logosol's head office in Härnösand!

Guests from 18 different countries come together to see, socialise and learn more about Logosol and their products. The row of flags below represents the different nationalities of the guests present.

### FERRY SVAN DEMONSTRATED UNDERHAND CHOP

Out in the demo area, all the sawmills and the CH3 planer were lined up and everyone who wanted to had the opportunity to do some sawing and planing. Also present was Ferry Svan who, given his great success at Stihl Timbersports, certainly knows how to handle both a chainsaw and an axe. He demonstrated his approach and technique by replicating the discipline of the Underhand Chop, which involves chopping a hefty log in half using an axe in the shortest possible time. Once he got going, you had to pay attention. It took only a few seconds before the log was in two pieces.

During the meeting, all the guests had a chance to speak to the different departments at Logosol. Many were impressed by Logosol's factory and our efficient and professional production of sawmills and

planing machines. One of them was André Brockschmidt from Bauforum24, a large German machinery community which tests and reviews different products.

André had recently tested Logosol's F2+ chain sawmill and was very pleased with the product.

"I'm generally very impressed with Logosol's products and the fact that it's a family-owned company with its own factory. I'll be leaving the meeting in a very positive mood," André says.

 ferrysvan

• When product developer Martin Melin shows guests the B1001 Hydraulic, the cameras come out to document the sawing and all the tips.

### PROFESSIONAL ADVENTURERS WITH THEIR OWN SAWMILL

A number of guests had travelled some way to attend the meeting, but among those who had travelled the furthest were Kielyn and Dave Marrone, who run the Lure of the North adventure company. They take their clients on spectacular trips into the Canadian wilderness. Kielyn appeared in the TV series Alone in which she survived for 80 days alone in the wilderness with only a few items to help her.

"It's been an absolutely fantastic weekend and incredibly fun to meet the people behind the machines we use. Everyone has been warm and friendly and we're impressed by the focus on quality at all levels and the product development," says Kielyn. With their F2+ chain sawmill they have big plans to build cottages and other things for their company.

A boat trip along Sweden's high coast took the whole group up to beautiful Björkudden and on the way Fresh Cut got the chance to speak to Fredrik Forssberg, CEO of Logosol.

"It's my first time attending a Logosol World Meeting and I have to say that I feel incredibly proud to be a part of this group. Everyone has incredible drive, a positive attitude and I've made many new friends in the past two days. I'm already looking forward to the next meeting!"

• Viktoria Carstens is a professional tree climber, forest technician and chainsaw professional. She is an ambassador for Stihl and inspires her many followers on Instagram. Here she tries out the newly developed remote feeding for chainsaws.

# BIG MILL Wide Slabber

Get on board. Saw and build with wide slabs!

## LOGOSOL BIG MILL

Wide slabber sawmill  
56" incl. bar and chain

**€3 268**  
(€3 440)

SKU 5000-000-0002

## For the largest logs

- ✓ Saw valuable wide slabs. You quickly make up your investment.
- ✓ The ultimate wide slab sawing system.
- ✓ Handles extremely big logs with excellent precision.
- ✓ Now you can easily produce wide, live-edge planks from various fine woods.

Included as standard with Big Mill: Tool for chain replacement and templates for precise setting of different plank thicknesses

Scan the QR code with your phone for more info and **technical data** about Big Mill

### Big Mill 66"

Incl. Big Mill, package 66", guide bar 66" and 1 saw chain for 66" bar. **Chain-saw is sold separately.**

**€3 453**  
(€3 635)

SKU 5000-000-0003

### Big Mill 84"

Incl. Big Mill, rail package 84", guide bar 84" and 1 saw chain for 84" bar. **Chainsaw is sold separately.**

**€4 197**  
(€4 418)

Part number 5000-000-0004

Available in three variants:

Max. log diameter 110 cm

Max log diameter 135 cm

Max log diameter 180 cm

Available with petrol engine

Available with electric motor

Swedish Quality Design

### ELECTRIC SAW FOR BIG MILL:

#### Logosol ES8 WS

Electric saw designed for Big Mill, 8 kW. Excl. feeding. **Bar and chain are sold separately.**

**€2 210**

SKU 4920-000-0005

### ELECTRIC SAW FOR BIG MILL:

#### Stihl MS881

For Big Mill, we recommend Stihl MS881 with an 8.6 hp engine. **Bar and chain are sold separately.**

### WARRANTIES FOR A SAFE BUY

When you buy a new machine from LOGOSOL, you receive a 2-year warranty. Here we could have set out the warranty terms that are in the catalogue, but we say for the sake of simplicity that we always try to be really understanding if something goes wrong. We believe that it's best for everyone in the long run if you continue to be completely satisfied with your Logosol machine.

2-month money-back guarantee – as it should be! When you get your new machine, you can take plenty of time to test it and make sure that it meets your expectations. Run the machine. Saw or plane a larger volume to see if it works as expected. We're not afraid to take back a machine with a little sawdust. You will only have to pay for the cutting equipment you've used and return shipping. That's all.

Watch videos and see complete product information at [logosol.com](http://logosol.com).
